

Soundz Fishy FlexSurface®
A fully adjustable console system
for the Avid S6 control surface.

FlexSurface 

SOUNDZ-FISHY.

FlexSurface® is a beautifully simple system that allows you to adjust every aspect of the Avid S6 control surface, for every session. Thoughtfully designed and engineered, FlexSurface offers greater flexibility in the control surface layout. Interchangeable buckets, adjustable rear modules, high-quality desking, rise and fall legs and innovative accessories offer the ultimate in console design and functionality.

"All in all this frame is a complete success. I feel like every single major design choice would be game changing on its own, but combined is really special... The ability to adjust the height has been a huge hit with everyone, including and especially clients. The small details are also greatly appreciated."

How does FlexSurface® work?

The moveable features of FlexSurface enable each operator to have the console layout that best suits them.

- Modules can be placed in any order within the channel strip.
- The rear module of the FlexAngle buckets can be set at six different angles from 2° through to 35°.
- The display module is adjustable.
- FlexAngle works for both a 5 and 9 knob set-up.
- The FlexAngle buckets can be arranged in any order on the frame.

What is FlexAngle®?

The FlexAngle buckets are the central element of FlexSurface. With six angle options for the rear modules, channel strips can be adjusted individually to suit the user. They can also be folded flat to give a clear sight line, and clients the view they want.

Choosing furniture for FlexSurface

Once the control surface has been chosen, you can decide whether to integrate it into our Ultra or Luxe furniture ranges. Luxe provides a classic furniture design incorporating our latest console system whilst Ultra delivers a more contemporary look. Alternatively, the FlexSurface console can be set on static or rise and fall legs.

Rear modules can be set in 6-positions (2°-35°)

A mechanism lifts and lowers the rear modules

FlexSurface accessories
 Designed and engineered to compliment our furniture, these accessories improve the ergonomics and functionality of the console. Choose from DAD MOM panels, tablet trays, keyboard trays, speaker and monitor stands, multi-positional screen sliders, cable trays and rack boxes for the ultimate in console design and functionality.

FAQs

Do I need to decide my S6 control surface layout before buying the console?

No, just how many channel strips you require. FlexSurface enables you to arrange them in any order across the control surface while the modules can be placed in any configuration.

Can I change the layout once it is set up?

Yes, FlexSurface is totally flexible. You can reconfigure the layout for each session, each operator or for a dual operator set up.

Can I buy FlexAngle for the main modules and flat buckets for a producer area?

You can but FlexAngle offers maximum flexibility across all modules as and when it's needed. FlexAngle also sits flat, opening up a whole host of options. Note: the master M40 module needs a flat bucket.

How long does it take for technicians to reconfigure the console for each session?

It takes minutes to change one channel strip and around 30 minutes for a complete reconfiguration of the control surface. Clients can send their preferences ahead for technicians to set up prior to the session. Alternatively, adjustments can be made whilst in the studio.

Can I use FlexAngle in different furniture ranges?

FlexAngle is only available in our furniture ranges, however we would be happy to create a unique look for your studio.

What do I need to buy from Avid Technology?

The modules, blank modules, network switch, PSU's and Molex harness.

If you'd like more information,
to book a demo or to discuss
a project, we'd love to hear
from you.
